

## Insulated gutters

Membrane insulated gutters from Corrivo are the perfect solution for industrial buildings. The membrane material is lined with insulation to improve a building's thermal insulation, and can be used in conjunction with insulated roof systems and insulated cladding panels.

More and more roofing contractors are opting for insulated roofing systems to create more energy efficient buildings, and insulated gutters are ideal for reducing emissions.

## Why choose insulated gutters from Corrivo?

- Significantly higher levels of joint integrity
- Excellent weather and corrosion resistance
- Lightweight and flexible material
- High-quality and durable finish
- Prevents cold spots to support higher energy efficiency in buildings
- Faster to install than traditional gutters
- Nationwide delivery direct to site
- Super quick turnaround times

### Membrane Specifications

Thickness	1.2mm +/- 0.25mm minimum	Flexibility in cold temperatures	Excellent
Standard widths	1000mm, 1250mm, 1475mm +/- 5mm	UV and weather resistance	Excellent
Composition	Non reinforce film manufactured from modified PVC	Colour	Basalt Grey RAL 7012

Nationwide delivery

Fast Turnaround times

Easy Installation

Made in UK
